Subject: [Non-DoD Source] RE: focus of the City council meeting

I think you are going to get questions about both. I don't think the Council nor the public makes the distinction between the type of work that TT did. I think they think if TT falsified data for RAD then why not other contaminants. Now that might not make as much sense practically, but you would have to explain that. Is that clear?

Thanks,
Jen

Jen -

We have another question before (b) (6). We are preparing to answer the questions you have presented; however, are you intending the focus to be all of TT work? Or just the radiological work?
